5) Issuer's Business, Products and Services

The purpose of this section is to provide a clear description of the issuer's current operations. In answering this item, please include the following:

- A. Summarize the issuer's business operations (If the issuer does not have current operations, state "no operations")

The Company plans to focus on new technologies, especially Fintech. The Company plans to add value by combining Fintech with existing established e-Commerce, e-Wallet and remittance players. In particular, the Company will continue with the development of a multi-faceted Indonesian sharia e-Wallet using the Company's state-of-the-art sharia Fintech features together with its two local Indonesian partners namely,

- (1) the Baitu Ma'al ("BMT") co-operatives (including the Pesantren schools). BMT has a total membership of approximately 30 million members;
- (2) Telkomsel is the largest Indonesian mobile operator with its own LinkAja e-Wallet.

By collaborating with these two entities, new business models are expected for Company as the current businesses of the BMT and their micro finance houses will migrate towards the new sharia Fintech platforms whereby not only current domestic funds transfers, utility payments and small micro finance loans will continue but in a more efficient manner and with less expensive rates. Additionally, new and enlarged Fintech businesses of e-Commerce coupled with rural e-logistics distribution will be introduced for BMT members. Telkomsel has the wide reach into the rural interior where telecommunications connectivity is essential for operating the e-Wallet platform.

Wherever feasible the Company plans to add value with block chain traceability to increase the overall efficiency and reduce costs especially for B2B e-Logistics and e-Know Your Client or e-KYC technologies to recruit many more members for the e-Wallet. Our mission is to add value using our Fintech platform which includes new e-KYC and e-Logistics track and trace supply chain solutions. Our difference will be that many items found on the supply chain can be traced to the source of origin using block chain solutions. These solutions will not only safeguard the interests of the stakeholders within the supply chain route but will protect the needs of the customers. The customers need to know what is safe and genuine. The suppliers need the payment assurances at the other end of the supply chain.
